

GENERAL DESCRIPTION

The SM-T2 / SM-R2 is a pair of CMOS chip, it was designed for remote controlled car applications.

The SM-T2 / SM-R2 has five control keys for controlling the motions (i.e. forward, backward rightward, leftward and the turbo function) of the remote controller car.

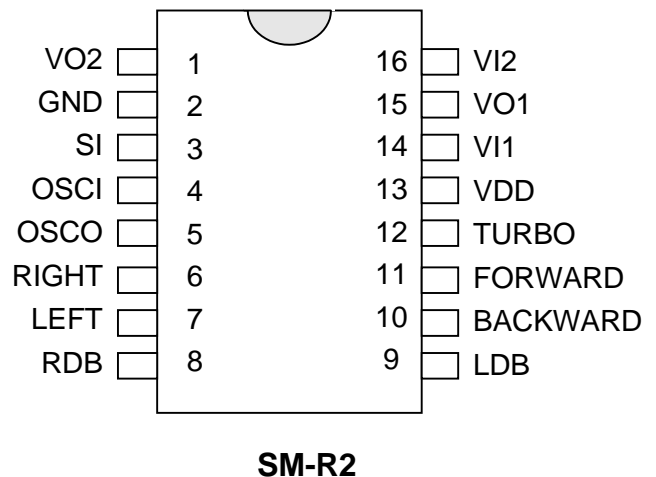

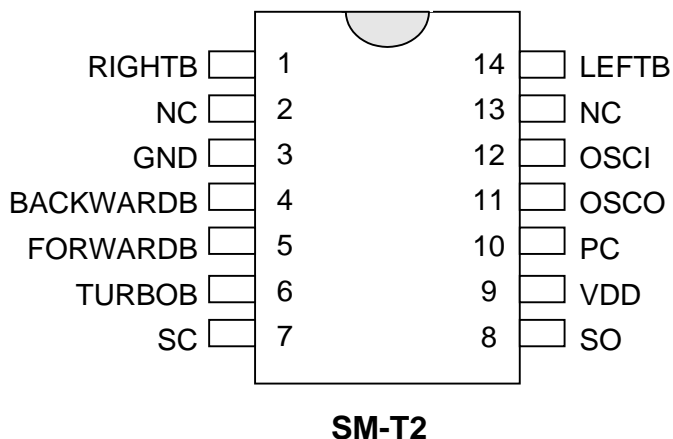

FEATURES

- * Power supply : 2.4V - 5.0V
- * Low stand-by current
- * Five functions control
- * Auto-power-off function for SM-T2
- * Few external components are needed

APPLICATION

- * Remote control car etc.

ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Ratings	Unit
DC Supply Voltage	VDD	5	V
Input/Output Voltage	VIN	GND-0.3 to VSS +0.3	V
Operating temperature	Topt	-10~60	°C
Storage Temperature	Tstg	-25~125	°C

COMMENTS

Never allow a stress to exceed the values listed under "Absolute Maximum Ratings", otherwise the device would suffer from a permanent damage. Nor is a stress since an extended exposure to the absolute maximum rating condition may also affect the reliability of the device, if not causing a damage thereof.
