### Description

This 100% Lead-free, RoHS compliant and Halogen-free fuse series has been designed specifically to provide over current protection to circuits that see high working ambient temperatures (up to 150°C) and high inrush currents.

The general design ensures excellent temperature stability and performance reliability.

This high I<sup>2</sup>t fuse series is designed to have ultra high inrush current withstand capability to avoid nuisance fuse open.

### Features

- Operating Temperature • from -55°C to 150°C
- 100% Lead-free and • **RoHS** compliant
- Suitable for both leaded ٠ and lead-free reflow / wave soldering
- Ultra high l<sup>2</sup>t values ٠

#### Applications

- Handheld Electronics
- LCD Displays
- Battery Packs
- Hard Disk Drives •
- SD Memory Cards
- Automotive Electronics .

Notes:

1. DC Interrupting Rating tested at rated voltage with time constant < 0.8 msecs.

2. Nominal Resistance measured with < 10% rated current.

3. Nominal Melting I<sup>2</sup>t measured at 1 msec. opening time.

4. Nominal Voltage Drop measured at rated current after temperature has stabilized.

Devices designed to carry out rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Rerating Curve" for additional rerating information.

Devices designed to be mounted with marking code facing up.

441 Series

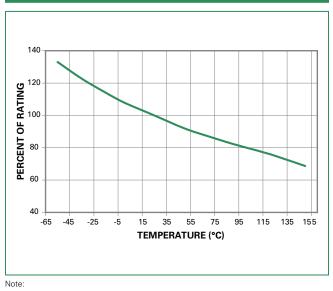

## **Surface Mount Fuses**

Ceramic Fuse > 441 Series

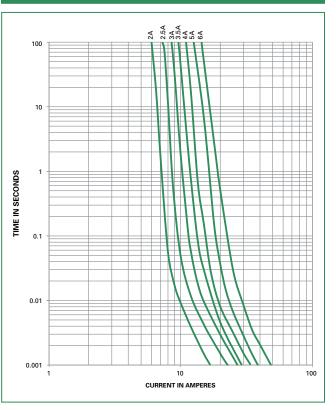

#### **Temperature Rerating Curve**

### **Average Time Current Curves**

1. Rerating depicted in this curve is in addition to the standard rerating of 20% for continuous operation.

For continuous operation at 75 degrees celsius, the fuse should be rerated as follows: I = (0.80)(0.85)I\_{RAT} = (0.68)I\_{RAT}
