- Excellent stability
- Available in ammo-pack.

DESCRIPTION

Rectifier diodes in cavity free cylindrical SOD91 glass packages, incorporating Implotec™⁽¹⁾ technology.

(1) Implotec is a trademark of Philips.

These packages are hermetically sealed and fatigue free as coefficients of expansion of all used parts are matched.

DEFINITIONS

Data sheet status	
Objective specification	This data sheet contains target or goal specifications for product development.
Preliminary specification	This data sheet contains preliminary data; supplementary data may be published later.
Product specification	This data sheet contains final product specifications.
Limiting values	
Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.	
Application information	
Where application information is given, it is advisory and does not form part of the specification.
