### General Description

The APA4880 is an integrated class AB stereo head-phone amplifier contained in an SO-8 or a DIP-8 plastic package. The APA4880 is capable of delivering 330mW of max. output power to an 8Ω load with less than 10% (THD+N) from a 5V power supply. The device has been primarily developed for portable digital audio applications. Both of the depop circuitry and mute circuitry are integrated in the APA4880, that reduces pops and clicks noise during power up and when using the mute mode(high active).
