PS Series

- Solid Functional Polymer Aluminum
- Radial Lead
- Ultra Low ESR
- Lead-Free Construction
- Solvent Proof
- +105°C Max. Temperature

The PS series is a radial lead miniature series of aluminum capacitors that uses a solid functional polymer as the electrolyte. This durable solid capacitor design allows more stable performance and higher reliability over the expected lifetime than normal liquid electrolyte capacitors. The PS series features large capacitance, ultra low ESR, high ripple current capability, and lead-free construction that can withstand the harsh environment of lead-free alloy soldering. The PS capacitors are suitable for DC-DC converters, voltage regulators, and decoupling applications for computer motherboards. The PS series has been upgraded to include new 20 and 25 volt models which are recommended as cost-effective replacements for OS-CON™ capacitors.

UPGRADE Engineering Bulletin Jul 03

The PS series capacitors are solvent proof. Refer to the Mini-Glossary for cleaning guidelines and recommended cleaning agents that are compatible with United Chemi-Con products.

Summary of Specifications

- Radial lead terminals.
- Capacitance range: 68 to 1,500µF.
- Voltage range: 2.5 to 25VDC.
- Category temperature range: -55°C to +105°C.
- Leakage current: 0.2CV maximum after 2 minutes at +20°C.
- Standard capacitance tolerance: ±20%
- Nominal case size (D×L): 8×11.5mm and 10×12.5mm.
- Rated lifetime: 2,000 hours at +105°C.

PS Series

PS Specifications

Item	Characteristics				
Category Temperature Range	-55 to +105°C				
Rated Voltage Range	2.5 to 25VDC				
Capacitance Range	68 to 1,500μF				
Capacitance Tolerance	±20% (M) at +20°C, 120Hz				
Leakage Current	I = 0.2CV maximum after 2 minutes at +20°C. To verify maximum leakage current, apply the DC rated voltage to the capacitors for 120 minutes at +105°C before measurement.				
	Where I = Max. leakage current (μ A), C = Nominal capacitance (μ F) and V = Rated voltage (V)				
Dissipation Factor (Tan δ)	0.12 maximum at +20°C, 120Hz				
Low Temperature Characteristics	At 100kHz, impedance (Z) ratio between the -25° C or -55° C value and $+20^{\circ}$ C value shall not exceed the values given below. Rated Voltage (V) 2.5-25 Z(-25^{\circ}C)/Z(+20^{\circ}C) \leq 1.15 Z(-55^{\circ}C)/Z(+20^{\circ}C) \leq 1.25				
Endurance (Load Life)	The following specifications shall be satisfied when the capacitors are restored to +20°C aftersubjecting them to the DC rated voltage for 2,000 hours at +105°C.Appearance: no significant damageCapacitance change: $\leq \pm 20\%$ of the initial measured valueTan δ (DF): $\leq 150\%$ of the initial specified valueESR: $\leq 150\%$ of the initial specified valueLeakage current: \leq initial specified value				
Bias Humidity Test	The following specifications shall be satisfied when the capacitors are restored to +20°C after subjecting them to the DC rated voltage for 500 hours at +60°C, 90-95%RH. Appearance : no significant damage Capacitance change: ≤ ±20% of the initial measured value Tan δ (DF) : ≤ 150% of the initial specified value ESR : ≤ 150% of the initial specified value Leakage current : ≤ initial specified value				
Surge Voltage Test	The following specifications shall be satisfied when the capacitors are restored to +20°C after the surge voltage at +105°C is applied through a protective resistor of 1,000 ohms at a cycling of 30 seconds on, 5.5 minutes off for 1,000 cycles. The surge voltage shall not exceed 115% of the rated voltage. Appearance : no significant damage Capacitance change: $\leq \pm 20\%$ of the initial measured value Tan δ (DF) : $\leq 150\%$ of the initial specified value ESR : $\leq 150\%$ of the initial specified value Leakage current : \leq initial specified value				
Failure Rate	1% maximum per 1,000 hours at +105°C with rated voltage applied. (Confidence level 60%)				

Part Numbering System for PS Series When ordering, always specify complete catalog number for PS Series.

Case Code: See Case Sizes in Tables. Design Code: Use only if design change code number is assigned by the factory. Ask United Chemi-Con for details. Capacitance Tolerance: M = ±20% Capacitance Value: Expressed in Microfarads. An R indicates a decimal point (e.g. 2R2 = 2.2µF). Series Name: Indicates Basic Capacitor Design. DC Rated Voltage: Expressed in Volts (e.g. 4 = 4WVDC). Note: Prefix code 6 = 6.3WVDC; 2R5 = 2.5WVDC.	<u>4 PS 560 M _ H11</u>	T15Lead Code: T15 = \emptyset 8 (F = 3.5mm) in Tape & Ammo Pack Box.T14 = \emptyset 10 (F = 5.0mm) in Tape & Ammo Pack Box.E = Optional 5mm Short Leads in Bulk.Blank = Standard Lead Length in Bulk.
