

Series 600 & 690

Optical Encoders

NEW

- Long life
- Low cost

Series 600 Light-Duty Encoder

Manually or motor operated rotary optical encoder that outputs two square waves at a maximum rate of 128 pulses in quadrature with other resolutions as low as 10 pulses available.

SERIES 600 FEATURES

- Long life-10 million revolutions minimum (contactless)
- Cost effective - elimination of A/D converters
- Stainless steel shafts and nickel-plated bushings in various lengths
- Stability- -40°C to $+65^{\circ}\text{C}$ operating temperature
- Variability-Cable and printed circuit terminations available

APPLICATIONS:

- Motion sensing and control • Motor control • Flow control
- Low-to-high input for test & measurement, medical and instrumentation • robotics • computer peripherals

- IC Detector
- High Temperature

Series 690 High-performance Encoder

Robust, compact, low profile package rotary optical encoder incorporating an integrated circuit detector for long life and high reliability. Encoders are two-channel quadrature output of 128 ppr as standard with other resolutions as low as 32 pulses available.

SERIES 690 FEATURES

- Integrated circuit detector for long life and high reliability
- Stability: -40°C to $+85^{\circ}\text{C}$ operating temperature
- Robust, economical, compact optical encoder. Up to 128 pulses per revolution in 1" square package
- Sealed housing suitable for industrial motion feedback or panel mounted applications
- Bearing model for high operating life
- Two channel quadrature output, pin or cable

APPLICATIONS:

- Motion sensing and control • Motor control devices • Flow control devices • Input devices

ISO 9001
CERTIFIED
