Crimp

2.5mm
(.098") pitch

EH CONNECTOR

Disconnectable Crimp style connectors

Radial Tape

This, the thinnest, 2.5mm (.098") pitch connector, is 8.1mm (.319") in height after mounting and 3.8mm (.150") in width. It is designed to meet the demand for the high-density connection of internal wires to printed circuit boards. It is compact, highly reliable and low in cost.

Features

• Compact and slim

This connector is designed to be compact and unusually thin. It measures only 8.1mm (.319") high after mounting and is just 3.8mm (.150") wide.

• Highly reliable contact

The contact has long dimples near the center that ensure continuity of low voltage and low current circuits at all times, even under conditions of vibration and abusive prying.

• Polarizing guides

The header and housing have guides to prevent improper mating.

• Whisker prevention

The contact material is treated with a reflow process, and the square post is copper-undercoated and tin/lead-plated for whisker prevention.

• Easy and effective crimping

Although the contact is compact, it has a long wire strip length, $2.6 \pm 0.4\text{mm}$ (.102" \pm .016"). This long length is very useful for automatic crimping and when crimping shielded wires.

Specifications

- Current rating: 3A AC, DC (AWG#22)
 - Voltage rating: 250V AC, DC
 - Temperature range: -25°C to +85°C
(including temperature rise in applying electrical current)
 - Contact resistance: Initial value/10m max.
After environmental testing/20m max.
 - Insulation resistance: 1,000M min.
 - Withstanding voltage: 800V AC/minute
 - Applicable wire: AWG #32 to #22
 - Applicable PC board thickness: 0.8 to 1.6mm (.031" to .063")
- * Contact JST for details.

PK...pink H...gray LE...light blue FY...vivid yellow

PC board layout (viewed from soldering side) and Assembly layout

Note:

- Tolerances are non-cumulative: $\pm 0.05\text{mm}(\pm .002")$ for all centers.
- Hole dimension differ according to the kind of PC board and piercing method. If PC boards made of hard material such as FR-4 are used, the hole dimensions should be larger. The dimensions above should serve as a guideline. Contact JST for details.
